24/7®

INOVA 24/7 LED SMARTBRIGHT®

the new look in handheld lighting takes functionality and versatility to a higher level.

Meaningful innovation

The INOVA 24/7 expands the role of the flashlight. Armed with multiple light and use modes, owners can take on a dynamic world, selecting and positioning the right light for the situation at hand. Far more than style, the 24/7 is the realization of demanding performance criteria — a perfectly tuned instrument that satisfies strict engineering requirements for light quality, functionality, durability and operation.

One tool — countless uses

Harnessing advanced LED technology, the microprocessor-controlled 24/7 packs eight steady and signal functions in less than 3" x 2" x 1". Its LED lamps project light up to 75' and offer two-mile signal visibility. The INOVA 24/7 has eight lifetime LED bulbs, while the included best-in-class lithium 123A battery powers the 24/7 and offers a +10 year shelf life.

At home in extreme environments

Ultrasonically-sealed polymer construction and recessed lamp design make the 24/7 as rugged as it is versatile. The INOVA 24/7 is water resistant and its compact construction makes it extremely rugged. It can take exposure to temperatures from -20° to +50° C without a thought. The INOVA 24/7 is lighting equipment that is built to last.

Multipurpose — multifunction

The 24/7 activates by rotating the octagonal dial to switch between 8 unique functions (shown at right). With its built in stainless steel clip, it attaches to clothing and gear. Available in 3 retail package configurations, it attaches to 4 accessories designed specifically for the 24/7: *Adjustable Neck Lanyard*, *Adjustable Headgear*, *Magnetic Mount*, and *Wall Mount*. Its intelligent design also enables freestanding operation. The 24/7 SmartBright is ready for any situation.

8 DIAL-IN FUNCTIONS

1

Low Output White
Steady, low intensity white light — perfect for reading.

2

High Output White
Steady, high intensity white light with 75' effective range.

3

Signal Strobe
Flashing, strobe pattern white light — 60 pulses per minute.

4

S.O.S. Signal
Flashing, S.O.S. pattern white light.

5

3 Color High Visibility Distress Strobe
Rapidly flashing sequential white, yellow and red light.

6

2 Color Emergency Beacon
Flashing sequential red and yellow light.

7

Night Vision Red
Steady red light — preserves eyes' night vision.

8

Locator Beacon
Intermittent red light pulses every 5 seconds to locate your 24/7 in the dark — insures 15,000 hour battery life.
